

10/9/69

Dear Emery,

The enclosures with your letter of the 6th are a delight!

"One could script it like the ghosts themselves! From Hoover down-
or up, depending on how you consider it/him.

My own opinion is that CE2655 is in error. This is the kind of error
that is not impossible. Depending on the interpretation of "on duty with the
United States Embassy in Moscow" is read. However, if one choses to really
mean working for the government, it is not inconsistent with other evidence, for
example, Oswald's letter to Connolly.

You have been your usual relentless self.

I would like very much to use this in AGENT OSWALD, one of the many
books I've started, with your permission. If there is anything you'd like masked,
anything you'd like eliminated (your name? but I prefer to credit), please let me
know or, better yet, please make as clear a set as you can with the omissions.

There is something not unrelated to this that a very fine researcher
has just come across. He is Paul Hoch, 2537 Regent St., #202, Berkeley, Calif.
94704. It seems that the Texas HEW was alerted to the fact that Oswald was
entitled to aid (for which he never asked). If you'd like what he has on this, why
not send Paul a set of what you sent me, except the last, unrelated page? It is
possible he and the also-fine people working with him may have other relative
things. Anything you want confidential, tell him. He is as dependable as anyone
can possibly be, and as well informed, including in the unpublished material.

On that last page, would you mind asking the masked source, if it does
not violate his obligations, the same question about a six-digit number and if
repeating numbers can have any significance?

Again many thanks. Keep it up!

Sincerely,

Harold Weisberg
